2 FDM-S2 Overview

2.1 Sampler Exploit

FDM-S2 is the second born device in our ELAD SDR SAMPLER line. This product line is developed to give the user the possibility to exploit and study the capability of Sampling technique.

With 122.88MHz sampling frequency FDM-S2 can offer the possibility to be a good HF and 6m receiver, but also allow to receive FM Band and part of VHF Band simply adding appropriate pre-selection filters in the front-end of ADC.

Some users of FDM-S2 already exploit the under-sampling technique to use it as pan adapter tuning it at IF frequencies of 68-70 MHz of their transceivers, while others use it to monitor the spectrum of a particular known frequency.

2.2 Front Panel Description

Power Led

Turns on when the receiver is connected to a USB port of the PC and it is switched on

Communication Led

Shows the communication between the receiver and the PC

2.3 Rear Panel Description

USB 2.0 Connector

Connection with the PC. Please use the supplied cable.

On/Off Switch

Turn On/Off the FDM-S2

HF Antenna Input

SMA 50 Ω input connector for HF band +20dBm max

VHF Antenna Input

SMA 50 Ω input connector for VHF band +20dBm max

External Hardware Connector

DB9 connector for external hardware (eg pre-selector filters board). This is NOT a serial port.

3 Software & Driver Installation

3.1 Software installation in Windows 8 Windows 7 and Windows XP

3.1.1 First-time install in Windows 8 and Windows 7

Double-click the file "setup.exe" in the CD .

The windows installer first installs the prerequisites:

- Microsoft VC++ 2010 Runtime libraries
- Microsoft .NET Framework 4.0 (Only for Windows 7)

and then the FDM-SW2 software.

• Click on "Accept" (Only for Windows 7)

3.1.3 Update an existing software version

Double click on file ELAD_FDM_SW2_V_x.xx.msi included in the update and follow the instructions.

3.2 FDM-S2 USB driver

3.2.1 FDM-S2 USB driver installation in Windows 8 and Windows 7

3.2.1.1 First driver installation

To install ELAD FDM-S2 driver, connect FDM-S2 sampler to a USB 2.0 socket on PC to power on the device. When Windows detects the new hardware, follow the steps listed below to install driver correctly:

Open **Control Panel** from **Start** menu, select "System" and "Device Manager". Expand "Other Devices" node: the system reads FDM-S2 firmware version named as FDMS2 USB FW 2.X.

Select FDMS2 USB FW 2.5, right click on it and execute "Update driver software".

When Windows starts the installation procedure, select the option "Browse my computer for driver software" (the second option).

	×
How do you want to search for driver software?	
Search automatically for updated driver software Windows will search your computer and the Internet for the latest driver software for your device, unless you've disabled this feature in your device installation settings.	
Browse my computer for driver software Locate and install driver software manually.	
	Cancel

In the next dialog-box, insert the driver folder location using "Browse" button and check the option "Include subfolders". In this way manual driver search is enabled.

	×
Update Driver Software - FDMS2 USB FW V2.5	
Browse for driver software on your computer	
Search for driver software in this location:	
C:\Program Files\ELAD\ELAD FDM-SW2\ELAD_FDM_Driver V Browse	
✓ Include subfolders	
Let me pick from a list of device drivers on my computer This list will show installed driver software compatible with the device, and all driver software in the same category as the device.	
Next	ancel

For 32 bit system select the folder: C:\Program Files\ELAD\ELAD FDM-SW2\ELAD_FDM_Driver For 64 bit system select the folder: C:\Program Files (x86)\ ELAD\ELAD FDM-SW2\ELAD_FDM_Driver Then click "Next".

Click Install.

Let the hardware installation automatically completes and, at the procedure ending, click on "Close"; then disconnect and connect FDM-S2 device on the same USB socket.

	×
Windows has successfully updated your driver software	
Windows has finished installing the driver software for this device:	
ELAD FDM-S2-25	
~	
	\square
	Close

Now ELAD FDM-S2 driver is installed on your PC.

3.2.2 FDM-S2 USB driver installation in Windows XP

3.2.2.1 First driver installation

To install ELAD FDM-S2 driver, connect FDM-S2 sampler to a USB 2.0 socket on PC to power on the device. Windows XP detects the new hardware and starts the hardware installation wizard. Then, next steps to install FDM-S2 driver are listed below:

At the first dialog box, select the last option "No, not this time" and "Next".

Select "Install from a list or specific location (Advanced)" and "Next".

In the next dialog-box, check the options "Search for the best driver in these location" and "Include this location in the search" to enable manual driver search. Clicking on "Browse", select the path where the driver folder is located: Local Drive (C:) \Programs\ELAD\ELAD FDM-SW2\ELAD_FDM_Driver. Then click "Next".

Found New Hardware Wizard
Please choose your search and installation options.
Search for the best driver in these locations. Use the check boxes below to limit or expand the default search, which includes local paths and removable media. The best driver found will be installed.
Search removable media (floppy, CD-ROM) ☐ Search removable media (floppy, CD-ROM) ✓ Include this location in the search:
m Files\ELAD\ELAD FDM-SW2\ELAD_FDM_Driver Browse Don't search. I will choose the driver to install.
O Don't search. I will choose the driver to install. Choose this option to select the device driver from a list. Windows does not guarantee that the driver you choose will be the best match for your hardware.
< Back Next > Cancel

Let the hardware installation automatically completes and click on "Finish"; then disconnect and connect FDM-S2 device on the same USB socket.

Now ELAD FDM-S2 driver is installed on your PC.

3.2.2.1 Driver installation verify in Windows 8 and Windows 7

To verify FDM-S2 driver current version, connect the device to USB socket (where the device driver is already installed) and open **Control Panel** from **Start** menu. Click on "System" and select "Device Manager".

Expanding "ELAD Samplers" node, FDM-S2 device driver is installed as "ELAD FDM-S2-25": right click on "ELAD FDM-S2-25" and select "Properties".

Declaration of Conformity (FCC)

The product marked as

FDM-S2

manufactured by

Manufacturer: ELAD S.r.l.

Address:

Via Col De Rust, 11 - Sarone 33070 CANEVA (PN)

complies with the following requirements: - FCC (Federal Communications Commission) Part 15

Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) This device must accept any interference received, including interference that may cause undesired operation.

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

Changes or modification not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

FCC ID: 2AAE5FDM-S2
